MeetingQuality
Meetings With Meaning

Product / Service Overview

MeetingQuality is a patent-pending, leading-edge technology that highlights opportunities and/or problems in order to predict project outcomes and to enable early course corrections.

What does MeetingQuality do?

MeetingQuality is a product and service that advances evaluation questions usually posed during the program / project post-mortem process and brings them into the project life-cycle.

All too often the first question of a post-mortem is *"What went wrong?"*

MeetingQuality's real-time assessments provide answers to questions such as:

- What's going well?
- What needs to be improved?
- What course corrections should be made?
- What are people really saying?
- How are people working together?

How does MeetingQuality work?

MeetingQuality provides simple and consistent Software as a Service (SaaS) for work groups, teams, steering committees and stakeholders to assess program / project progress, to assess the health of interpersonal and team relationships and to achieve balances between operational, financial and strategic goals, customer constraints, external factors and the management of risk. MeetingQuality Consulting Partners provide management advisory services by interpreting the results and turning them into real-world solutions.

Agile Portfolio Report

Project	Backlog		Demo		Retro	
	MQS	PSP	MQS	PSP	MQS	PSP
Agile Project A	50%	84%	66%	92%	69%	82%
Agile Project B	-	-	56%	55%	59%	61%
Agile Project C	-	-	66%	74%	63%	64%

Waterfall Portfolio Report

Project	Steering Committee		Project Team		Stakeholders	
	MQS	PSP	MQS	PSP	MQS	PSP
Waterfall Project A	68%	75%	73%	56%	65%	71%
Waterfall Project B	54%	80%	35%	40%	59%	25%
Waterfall Project C	80%	74%	68%	76%	73%	78%

**Small Footprint – Low Overhead**

## What kinds of overhead does MeetingQuality require?

MeetingQuality makes only a very small footprint in organizational activities, while it delivers critical metrics and reports that provide instant insight into portfolio management, governance, and the likelihood of program / project success

What techniques does MeetingQuality use?

MeetingQuality collects project performance and human-factor information then uses proprietary algorithms, Social Network Analysis techniques and Artificial Intelligence (IBM Watson) to aggregate this information into metrics and reports that predict program / project progress over time.

What are some by-product benefits of using MeetingQuality?

MeetingQuality is a pragmatic method to discover ways to improve alignment between an organization's formal and informal leadership and its formal and informal structures. MeetingQuality demonstrates the linkage between the quality of interpersonal relationships and performance and highlights how gender may have an effect on peer assessments.
